

Kashika Chopra

West Lafayette, Indiana | (765) 543-5624 | kashika222@gmail.com | [LinkedIn](#) | [Portfolio](#)

Business Analyst with 3 years of consulting experience delivering business intelligence and analytics solutions for Fortune 500 organizations. Experienced partnering with executive stakeholders to define business requirements, develop KPIs, analyze enterprise datasets, and build scalable reporting solutions. Skilled in SQL, Power BI, Snowflake, and data visualization with a proven ability to manage analytics initiatives from requirements through implementation in fast-paced environments.

EDUCATION

Purdue University, Daniels School of Business

Master of Science, Business Analytics and Information Management

West Lafayette, IN

August 2026

University of Petroleum and Energy Studies

Bachelor of Technology, Computer Science

Uttarakhand, India

May 2022

PROFESSIONAL EXPERIENCE

Kearney

West Lafayette, IN

Kearney Student Labs (Capstone Course)

January 2026 - April 2026

- Partnered with Kearney consultants and Fortune 500 procurement stakeholders to translate ambiguous business challenges into a 4-tier spend classification framework, supporting strategic sourcing decisions.
- Developed an AI-powered analytics solution processing 12M+ procurement invoices, transforming enterprise data into actionable insights and executive recommendations presented to procurement and data science leadership.

DefineRight

Bangalore, India

Senior Technology Analyst

September 2024 - July 2025

- Led 5 cross-functional analytics initiatives supporting FP&A, Omnichannel Strategy and Operations teams, partnering with executive stakeholders to define business requirements, establish KPIs, and deliver scalable reporting solutions that improved operational visibility across business functions.
- Owned executive Power BI dashboards supporting 400+ business users, automating reporting workflows, improving reporting accuracy by 40%, reducing reporting redundancy by approximately 30%, and enabling leadership to monitor operational performance through actionable metrics.
- Integrated data from 3 enterprise systems to develop scalable reporting models that strengthened data integrity, improved reporting consistency, and enabled faster business decisions through reliable executive reporting.
- Served as Technical Project Manager across analytics initiatives by gathering business requirements, developing Business Requirements Documents (BRDs), coordinating deliverables with Azure DevOps, validating reporting outputs, and driving successful implementation of reporting enhancements.

ZS Associates

Gurugram, India

Business Technology Solutions Associate

May 2022 - August 2024

- Partnered with Commercial Operations, Incentive Compensation, and Technology teams to define business requirements, establish KPIs, and develop enterprise reporting solutions that improved performance visibility across multiple business units.
- Led end-to-end delivery of 2 enterprise reporting solutions and contributed to 3 additional analytics initiatives, balancing competing priorities while coordinating cross-functional stakeholders from requirements gathering through deployment.
- Modernized legacy Qlik Sense dashboards by redesigning them in Power BI using Power Query and DAX, reducing dashboard refresh time by approximately two hours while improving reporting efficiency and executive visibility into business performance.
- Developed SQL data models supporting enterprise datasets containing 20–50 million records, enabling KPI reporting, trend analysis, ad hoc reporting, and self-service analytics across 4 business units.
- Developed UAT plans, validated reporting accuracy, coordinated stakeholder feedback, and created training documentation supporting successful adoption of enterprise Power BI reporting solutions.

RESEARCH & PROJECTS

- Research Publication: “Load Balancing and Scheduling: Examination in view of COVID-19 Protocols” published in conference proceeding (ICICITES - 2021) by Taylor & Francis Group
- StyleSync (AI-Powered Personal Fashion Intelligence Platform): Developed an end-to-end AI application that combines computer vision, large language models, and analytics to digitize wardrobes and deliver personalized shopping and outfit recommendations. Built data pipelines, AI-powered classification, utility scoring models, and interactive dashboards using React, FastAPI, Supabase, and Gemini to transform unstructured image data into actionable, user-centric insights through data-driven decision-making.

SKILLS

- Business Intelligence & Collaboration:** Power BI, DAX, PowerQuery, Qlik Sense, Excel, Tableau, Jira, AzureDevOps
- Data Analytics:** SQL, Snowflake, Python, SAS, BigQuery
- Certifications:** AWS Certified Cloud Practitioner (CLF-C02), Microsoft Azure AI Fundamentals (AI-900)
